Introduction to Software Engineering
236321

ARNON LAZERSON
Welcome

- This course is not hard, but it requires hard work!
- The first course in the software engineering track to zoom out
  - From programs to software
  - From processor, network and functions, to system, client and objects
- Anyone can learn something (even those who are already working...)

INTRODUCTION TO SOFTWARE ENGINEERING
Project

- A semester-long project.
- 50% of the final grade
- Groups of 4
- 3-4 submissions

Bonus: you can work in the SSDL lab
  - But you have to follow the lab regulations...
Questions ?
