Final Submission
In two weeks we have two big events for the course: final presentations and final submissions. The final submissions will be on 22/01/18 - in that day you present your application to us, you can sign here: https://doodle.com/poll/qsap8h2swbi3t98v. In that day the application needs to be complete. All the requirements from the backlog need to be implemented. On 25/01/18 your application and code will be checked again (after the fair), so you'll have some time to fix bugs and work on WIKI and README, tests.

Bad connection scenario
Make sure you handle cases where you have bad, weak or even no internet connection. You should provide some reasonable handling of such cases and definitely shouldn't crash.

Requirements
1. OOP convention, designed and commented well code. Design the components together before you implement them.
2. Tests - test main flow
   a. UI testing - Espresso
   b. Backend testing - integration - Roboelectric
   c. Logic testing - mocks and stubs are your best friends
3. Understandable User-friendly UI, Use material design principles you learned on lectures.
4. Publish your app ASAP so other users can give you feedback. Send a link to friends etc.
5. Documentation - WIKI and README. Try to make them understandable. You need to write them for other programmers and users. What will they need to know about your app?

Projects fair
On 23/01/18 You'll be presenting your apps to the student body in a project fair. Each team will have a station with their poster and guests will walk around and visit the stations. The presentation will take place in Taub floor 0 on hours: 12:30-14:30. Please come at ~12:00 to set up your station and make sure everything works. Make sure to fix all the bugs before the presentation. You don't want your app to crash while you're showing it to somebody. Rest assured that you'll find new bugs during the presentation so you'll have till Thursday to fix those. If you have any questions during the presentation you can ask Sapir for help.

Posters submission
We uploaded to ‘Assignments’ section a poster template. You need to submit it until 09/01/18. Please use only free images/icons from web.

Good Luck!
